

The register screen is where users can create a new account. They input their full name, email, and password. The "Remember Me" checkbox is included for user convenience. Additionally, users have the option to expedite the registration process by signing up using their Facebook or Google accounts. For those who already have an account, a quick link directs them to the sign-in screen.

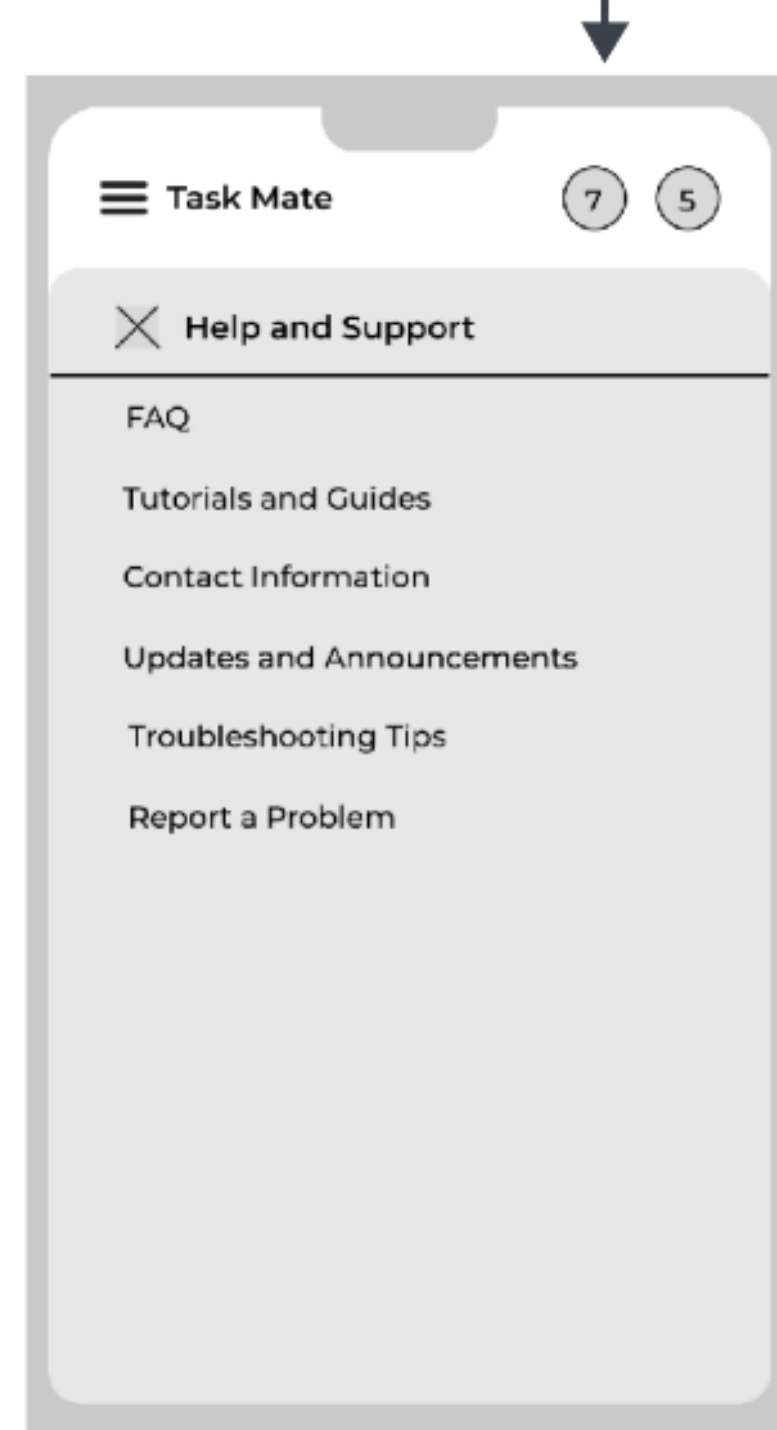

After users click the "Sign-In" button on the welcome screen, they are directed to the login screen. Here, they input their email and password. Additionally, there is an option to recover a forgotten password. The "Remember Me" checkbox is a convenience feature for users who want to stay logged in. Users without an account can easily navigate to the sign-up screen.

TaskMate: Your essential tool for simplified task management. Stay organized, set priorities, and receive timely reminders. Elevate your productivity effortlessly.

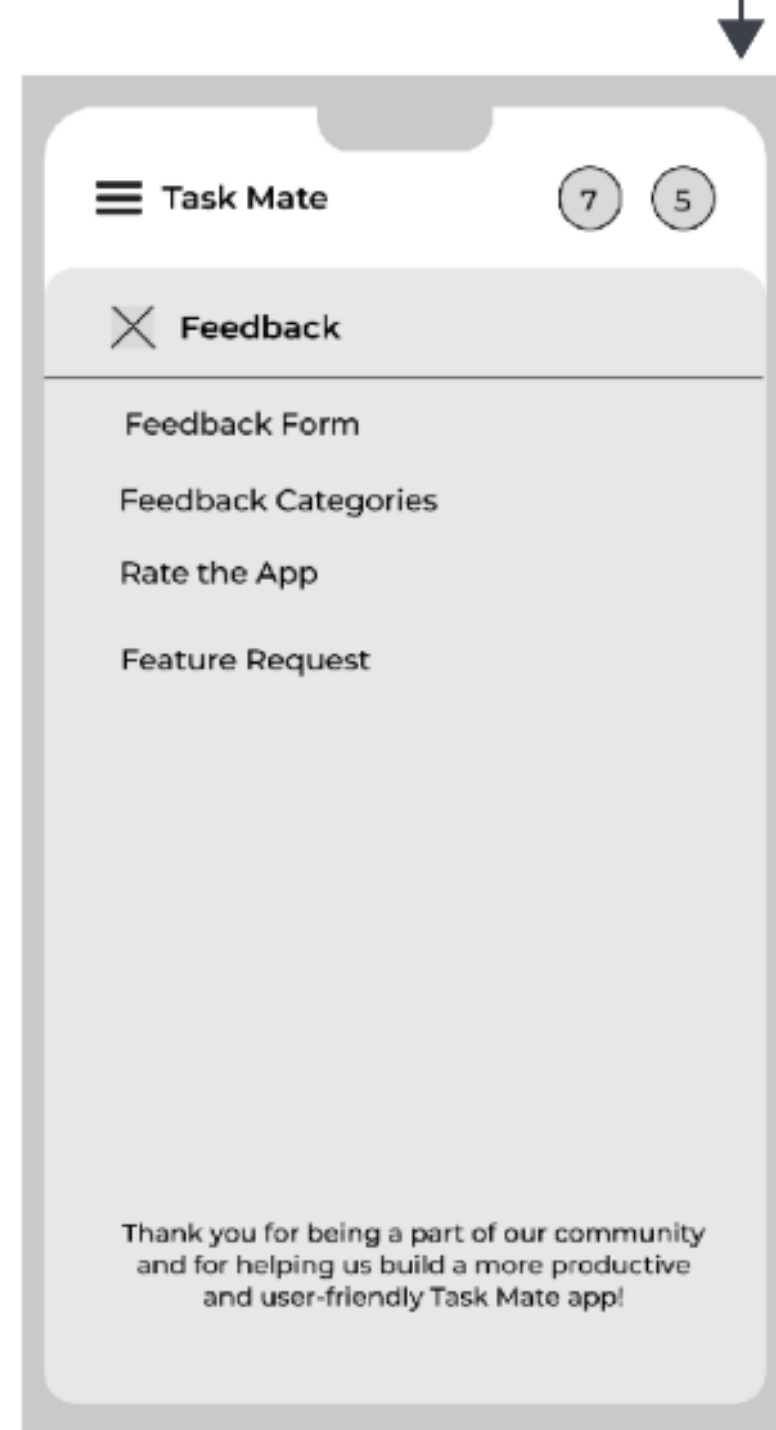

The welcome screen serves as the first impression for users. It introduces your app, presents a welcoming message, and prominently features a "Sign-In" button to encourage users to access their accounts or create a new one.

Settings  
Users can manage account details, tweak notification preferences, personalize the theme and language, and customize date and time formats. The Backup and Sync features offer flexibility in data storage preferences. The section also allows users to check the app version, delete their account if needed, and provides a robust Feedback and Support category for seeking assistance and submitting feedback. This comprehensive Settings section empowers users to personalize their TaskMate experience while also offering essential tools for account management and feedback.

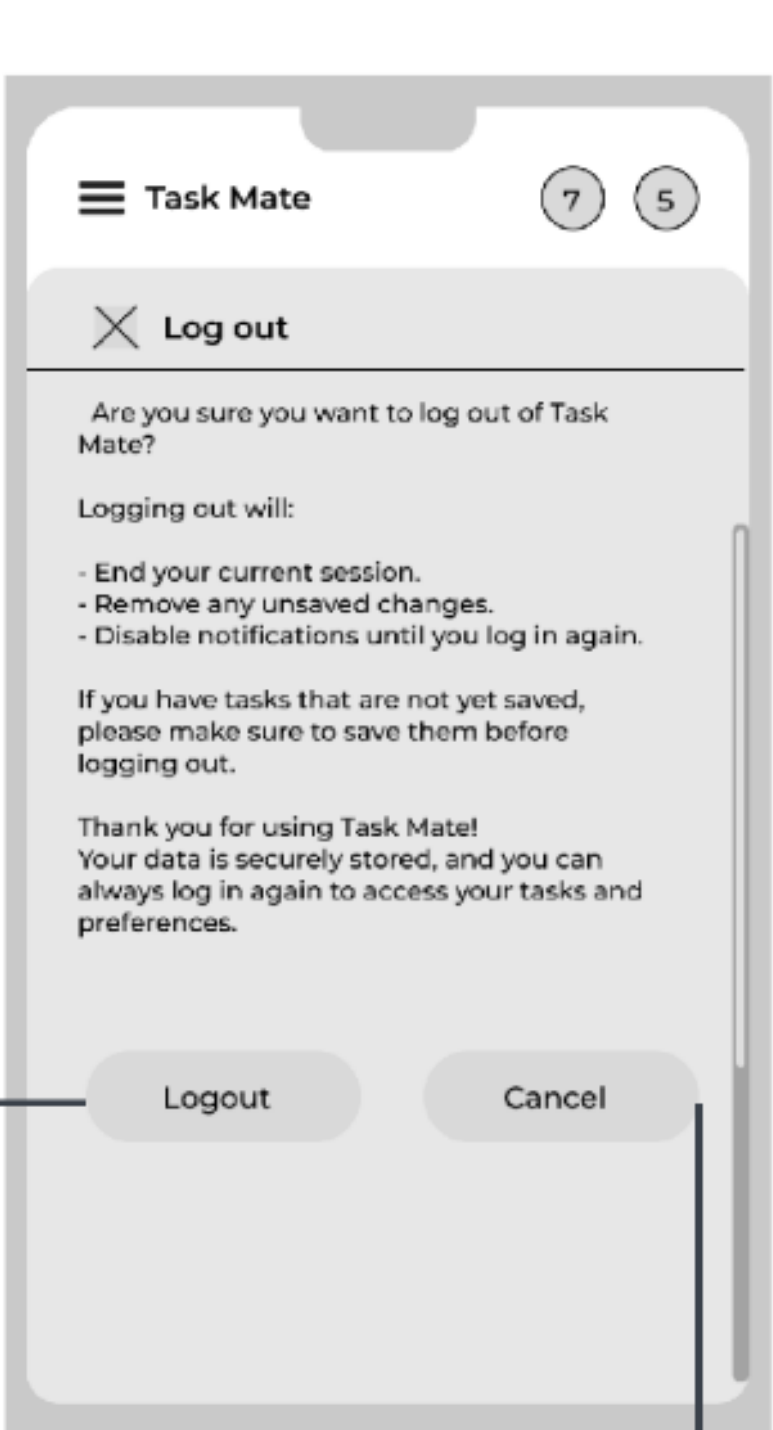

Help and Support  
It includes Frequently Asked Questions (FAQs) for quick problem-solving, Tutorials and Guides for step-by-step assistance, and Contact Information for personalized support. Users can stay updated on the latest features through Updates and Announcements. Troubleshooting Tips are available to address common issues, and a dedicated section allows users to Report a Problem for quick resolution. This robust support system ensures users have the tools they need for a smooth TaskMate experience.

Feedback  
With a Feedback Form, users can share thoughts, report issues, or suggest ideas. Categories organize input for better understanding. Users can Rate the App for quick feedback and submit Feature Requests to influence future developments. This collaborative approach ensures TaskMate evolves based on user preferences and needs, fostering a user-centric experience.

About  
Offers users a deeper understanding of the app's mission, features, and the team driving its development.

Logout  
The "Logout" feature in Task Mate incorporates an added layer of security and user confirmation. When users initiate the logout process, a confirmation dialog will prompt them to confirm their decision. This ensures that users don't accidentally log out and lose unsaved data. Upon confirmation, Task Mate securely logs the user out and redirects them to the welcome screen.
